

- 1) Glucosamine hydrochloride is the scientific trial and clinical experience proven backbone of an effective joint supplement (1,2,3,4,5).**
- 2) It has been shown that Glucosamine Hydrochloride has long term anti-inflammatory effects comparable to NSAIDs such as phenylbutazone or firocoxib without the side effects (6).**
- 3) Giving Glucosamine Hydrochloride in feed daily has proven to reduce the need for joint injections (7).**
- 4) Glucosamine Hydrochloride has recently been shown to protect joint cartilage from damage by steroid injections when they are necessary (8).**
- 5) Glucosamine has the potential to prevent bone resorption, a key component of the arthritic syndrome (3).**
- 6) Oral Hyaluronic Acid has been shown to reduce inflammation in joints rapidly when 100 mg is given per day (9).**

Glucosamine Hydrochloride fed daily in an adequate dose of 10,000 mgs per 1,000 lb horse is the only joint supplement your horse in light work needs. Adding 100 mgs per 1,000 lb horse of Hyaluronic Acid offsets the joint inflammation caused by more strenuous athletic activity. Please see our Small Animals page for dog and cat information.

Pan American Veterinary Corporation offers pure Glucosamine Hydrochloride as Top Form joint supplement, and Glucosamine Hydrochloride and Hyaluronic Acid as Supreme Top Form.

These pure products are offered to you at the best price available.

If you find another joint supplement that supplies your horse with 10,000 mgs Glucosamine Hydrochloride and 100 mgs Hyaluronic Acid per day for a better price than ours, we will match that price.
